

STEP 1 . Release the latch. Deploy the cart and make sure the parking brakes are engaged. Then, release the latch on the base of the box.

STEP 2 . Release the strap. Release the strap on the top of the box.

STEP 3 . Lift the top lid. Now, lift the top lid from the front side, like this, and move the rear panel toward the handlebar.

STEP 4 . Clip de strap. Attach the rear panel to the handlebar by clipping the strap into the side-release buckle. No adjustment is needed.

STEP 5 . Lift the side panel. Make sure all panels are fully unfolded and in a vertical position, fitting neatly into the edge of the top lid.

STEP 6 . Align and fit rear corner. Make sure the corner fits properly.

STEP 7 . Secure the top lid. Once the rear corner is in place, fit the rear corner into place, then hook the metal flap.

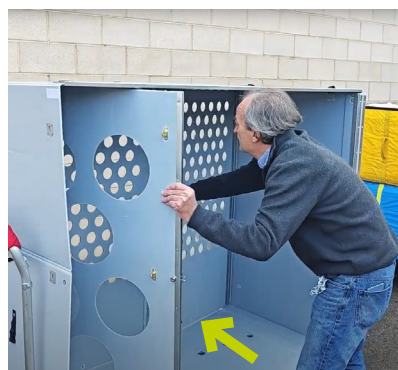

STEP 8 . Unfold the doors. Move them to the outside of the cover box,

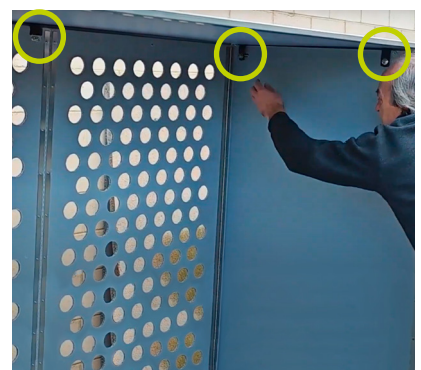

STEP 9 . Secure the doors. Secure them there using the metal snap fastener. **Remember, always lift the snap button tops to lock or release them.**

STEP 10 . Unfold the back panel. Devolverlo a su posición original.

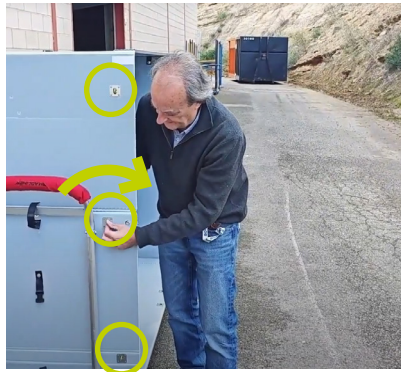

STEP 11 . Push it completely to the back until it's fully extended, like this. Make sure all panels are fully unfolded so everything fits into place.

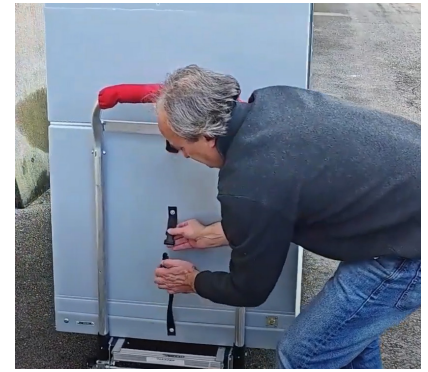

STEP 12 . Secure the box lid, fasten the three snap buttons located in these positions. If the box is correctly unfolded, this step will be easy.

STEP 13 . Unfold the last panel. Make sure it is properly fitted into place. The lid's metal part must rest on top of the panel's metal part.

STEP 14 . Secure the three safety pins by turning them: one beside the lock, one at the top, and one at the bottom.

STEP 15 . Clip the strap, into its buckle to prevent it from hanging loose. The box cover is now fully unfolded, and we can close the doors.

STEP 16 . Release the doors. Unlock the snap button by lifting the mechanism upward. **Remember,** always lift the snap button tops to release them.

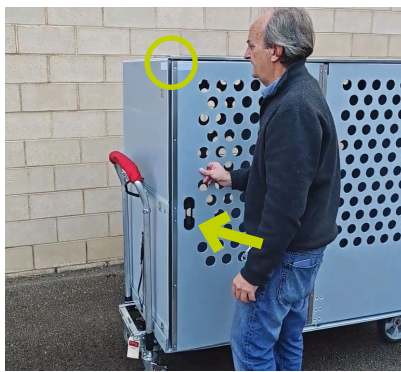

STEP 17 . Turn the door to his position.

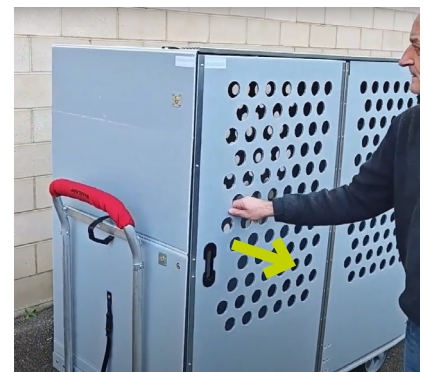

STEP 18 . Secure first the sliding latch at the base of the box. **Make sure to secure it properly so that it does not get in the way when unfolding.**

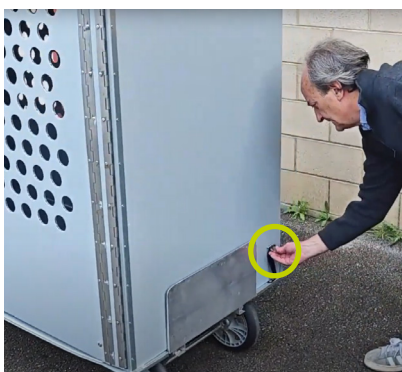

STEP 19 . Fasten the latch button at the top by lifting the upper part of the mechanism.

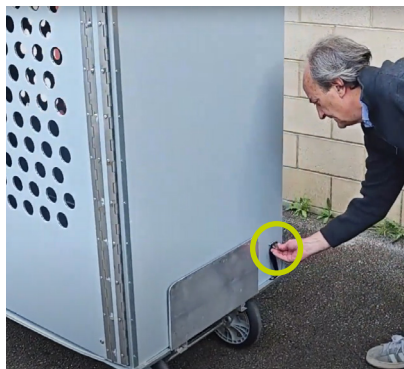

STEP 20 . Close the main door. For proper locking, make sure to align the visual mark; the lock will engage and stay closed.

STEP 21 . Make sure the doors are properly closed and secured.

STEP 22 . Fasten the strap, so it doesn't hang loose. We're now ready to start loading the cover box. **Remember,** always lift the snap button tops to lock.

STEP 1 . Release the latch from the base of the cover box.

STEP 2 . Release the strap with the side-release buckle located here.

STEP 3 . Unlock the door using the key. Do not leave the key in the lock while folding.

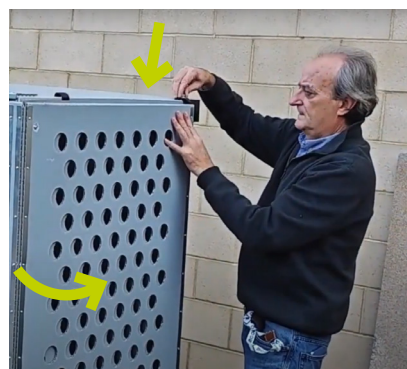

STEP 4 . Open the door. Use the magnets to hold the main door open in position.

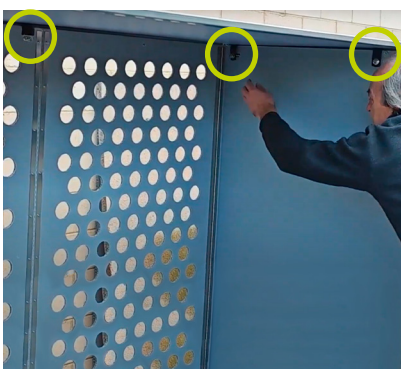

STEP 5 . Release the latch button at the top.

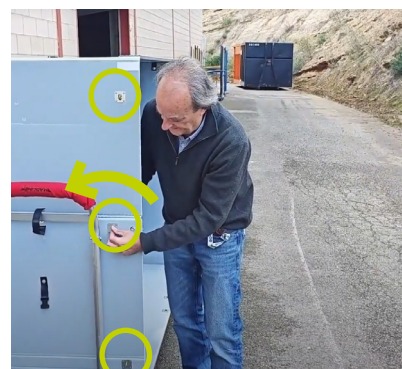

STEP 6 . Release the sliding bolt at the base.

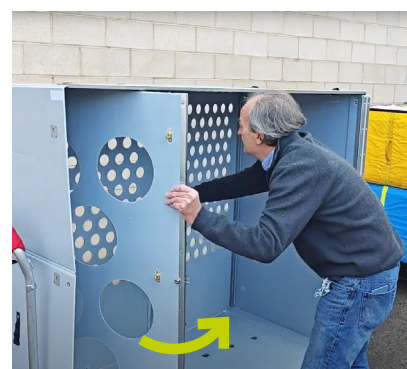

STEP 7 . Fold the doors and fix them in place. Make sure to lift the top of the snap button to engage it. **Remember, always lift the snap button tops to lock.**

STEP 8 . Remove the three snap buttons that secure the top lid. To release them, you need to lift the top of the mechanism.

STEP 9 . Release these three fasteners by turning them like this, to separate the inner panel.

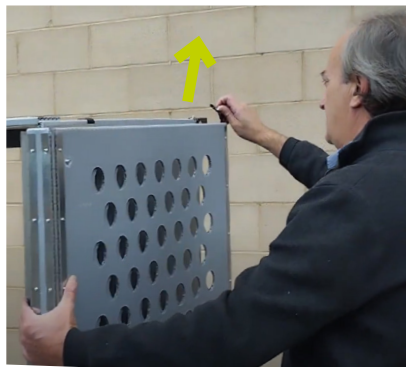

STEP 10 . Fold the rear panels. First separate the lateral panel.

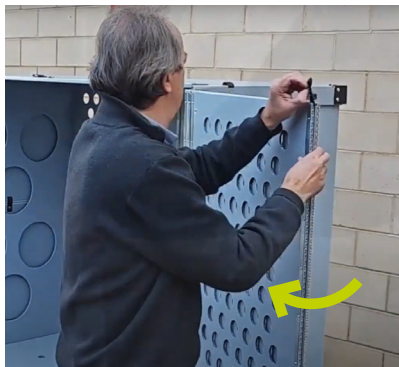

STEP 11 . Pull this hinge area toward you.

STEP 12 . Fold the panels completely against this wall.

STEP 13 . Release the doors. Unlock the snap button by lifting the mechanism upward. To release them, you need to lift the top of the mechanism.

STEP 14 . Turn the door to his position.

STEP 15 . Release the lid. Hold the panels together with one hand, and release the top lid with the other hand, like this.

STEP 16 . Carefully lower the panels toward the base of the box and place them in their folded position.

STEP 17 . Fit the slot. You'll see the correct position by fitting this piece into its slot. This will keep it centered.

STEP 18 . Release the side-release buckle to detach the strap that holds the panel to the handlebar.

STEP 19 . Fold the panel inward and lower it together with the top lid as shown here. Make sure the front part of the top lid is placed in its position,

STEP 20 . Make sure that the lid fits correctly inside the metal panel of the car.

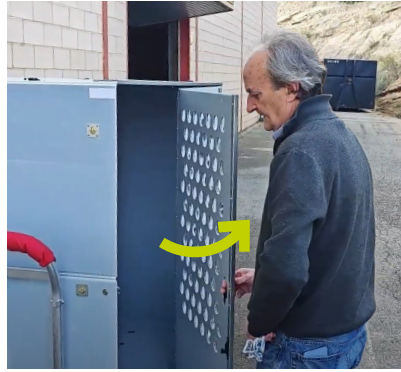

STEP 21 . Clip de strap to secure the folded box.

STEP 22 . Fasten the strap. Once the box is secured in its folded position, it can be lifted for storage or transport.

STEP 1 . Unlock the door using the key. Do not leave the key in the lock while folding.

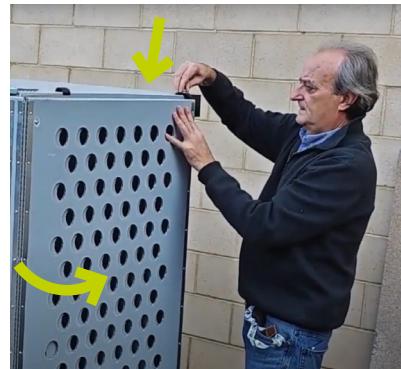

STEP 2 . Open the door. Use the magnets to hold the main door open in position. **(Partial loading/unloading position).**

STEP 3 . Release the latch button at the top. To release them, you need to lift the top of the mechanism.

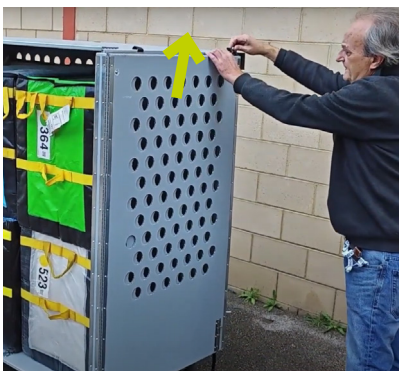

STEP 4 . Release the sliding bolt at the base. **Make sure to secure it properly so that it does not get in the way when unfolding.**

STEP 5 . Fold the doors and fix them in place. Make sure to lift the top of the snap button to engage it.

STEP 6 . Load/Unload the delivery bags in the desired order, to allow easy access later. Up to six Amazon delivery bags can be loaded inside.

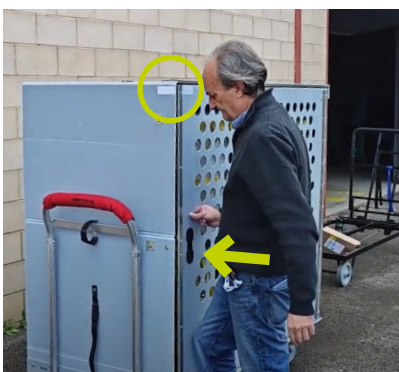

STEP 7 . Release the doors and turn cover box. Always remember to lift the upper part of the latch button mechanism to release or secure it.

STEP 8 . Close the sliding bolt at the base. This way, you can create the necessary spacing in case the bags take up too much space.

STEP 9 . Secure the latch button at the top. Remember, always lift the snap button tops to lock.

STEP 10 . Close the door. Release the main door from its magnetic holder, align the visual guide and press inward.

STEP 11 . Make sure the doors are locked properly.
